

Overview

Ejar offers a suite of APIs that allow to perform operations over EJAR contracts using custom platforms designed by the partners.

Those API currently allow partners to read and create new contracts, submit those contract for approval, perform entity, properties and unit check and discovery.

Requirement for using EJAR APIs

- Partners must have access api user and api key. Those are provided by the EJAR operation team upon request.
- All APIs are subject to [rate limits](#)
- All APIs require partners to [authenticate](#)
- Unless specified, all communication (input and output format) are made in JSON. We recommend you adding header `Content-Type: application/json; charset=utf-8` to all your request to the EJAR server.

Available APIs

External Contract Registration Service (ECRS)

External Contract Registration Service allows you to create and register new contract using API endpoints instead of the Ejar interface.

Authentication

All EJAR APIs requires credentials to access the endpoints.

Requesting new credentials

Requirement for accessing the APIs:

- You must be registered as Brokerage Office on the EJAR platform
- You must contact the EJAR operation team and request for access to the API.

Authenticating queries

Every queries made to EJAR APIs require to pass Authentication header to the API endpoint. Authentication uses [Basic authentication strategy](#) with pair of API key and API secret key.

Example is given below:

```
Example API key: ECRS-mzmg0v-14cd
Example API secret key: cpl2fg0ru7g3gq583j94licba
```

- First, you need to generate Base64 representation of your access credentials:

```
$ echo -n ECRS-mzmg0v-14cd:cpl2fg0ru7g3gq583j94licba | base64
# > RUNSUy1tem1nMHYtMTRjZDpjcGwyZmcwcnU3ZzNncTU4M2o5NGxpY2Jh
```

- Then, you can use this string as Authentication header:

```
$ curl -X GET https://eservices.ejar.sa/api/v1/ecrs/ \
-H "Authentication: Basic RUNSUy1tem1nMHYtMTRjZDpjcGwyZmcwcnU3ZzNncTU4M2o5NGxpY2Jh"
```

If your credentials are correct, this should returns `200 OK`. Otherwise, you will get `403 - Forbidden` status. (note: *In this example, credentials are not working*).

Every call to the API must pass the credentials in the Authentication header.

In case your credentials have been compromised, please contact the EJAR operation team.

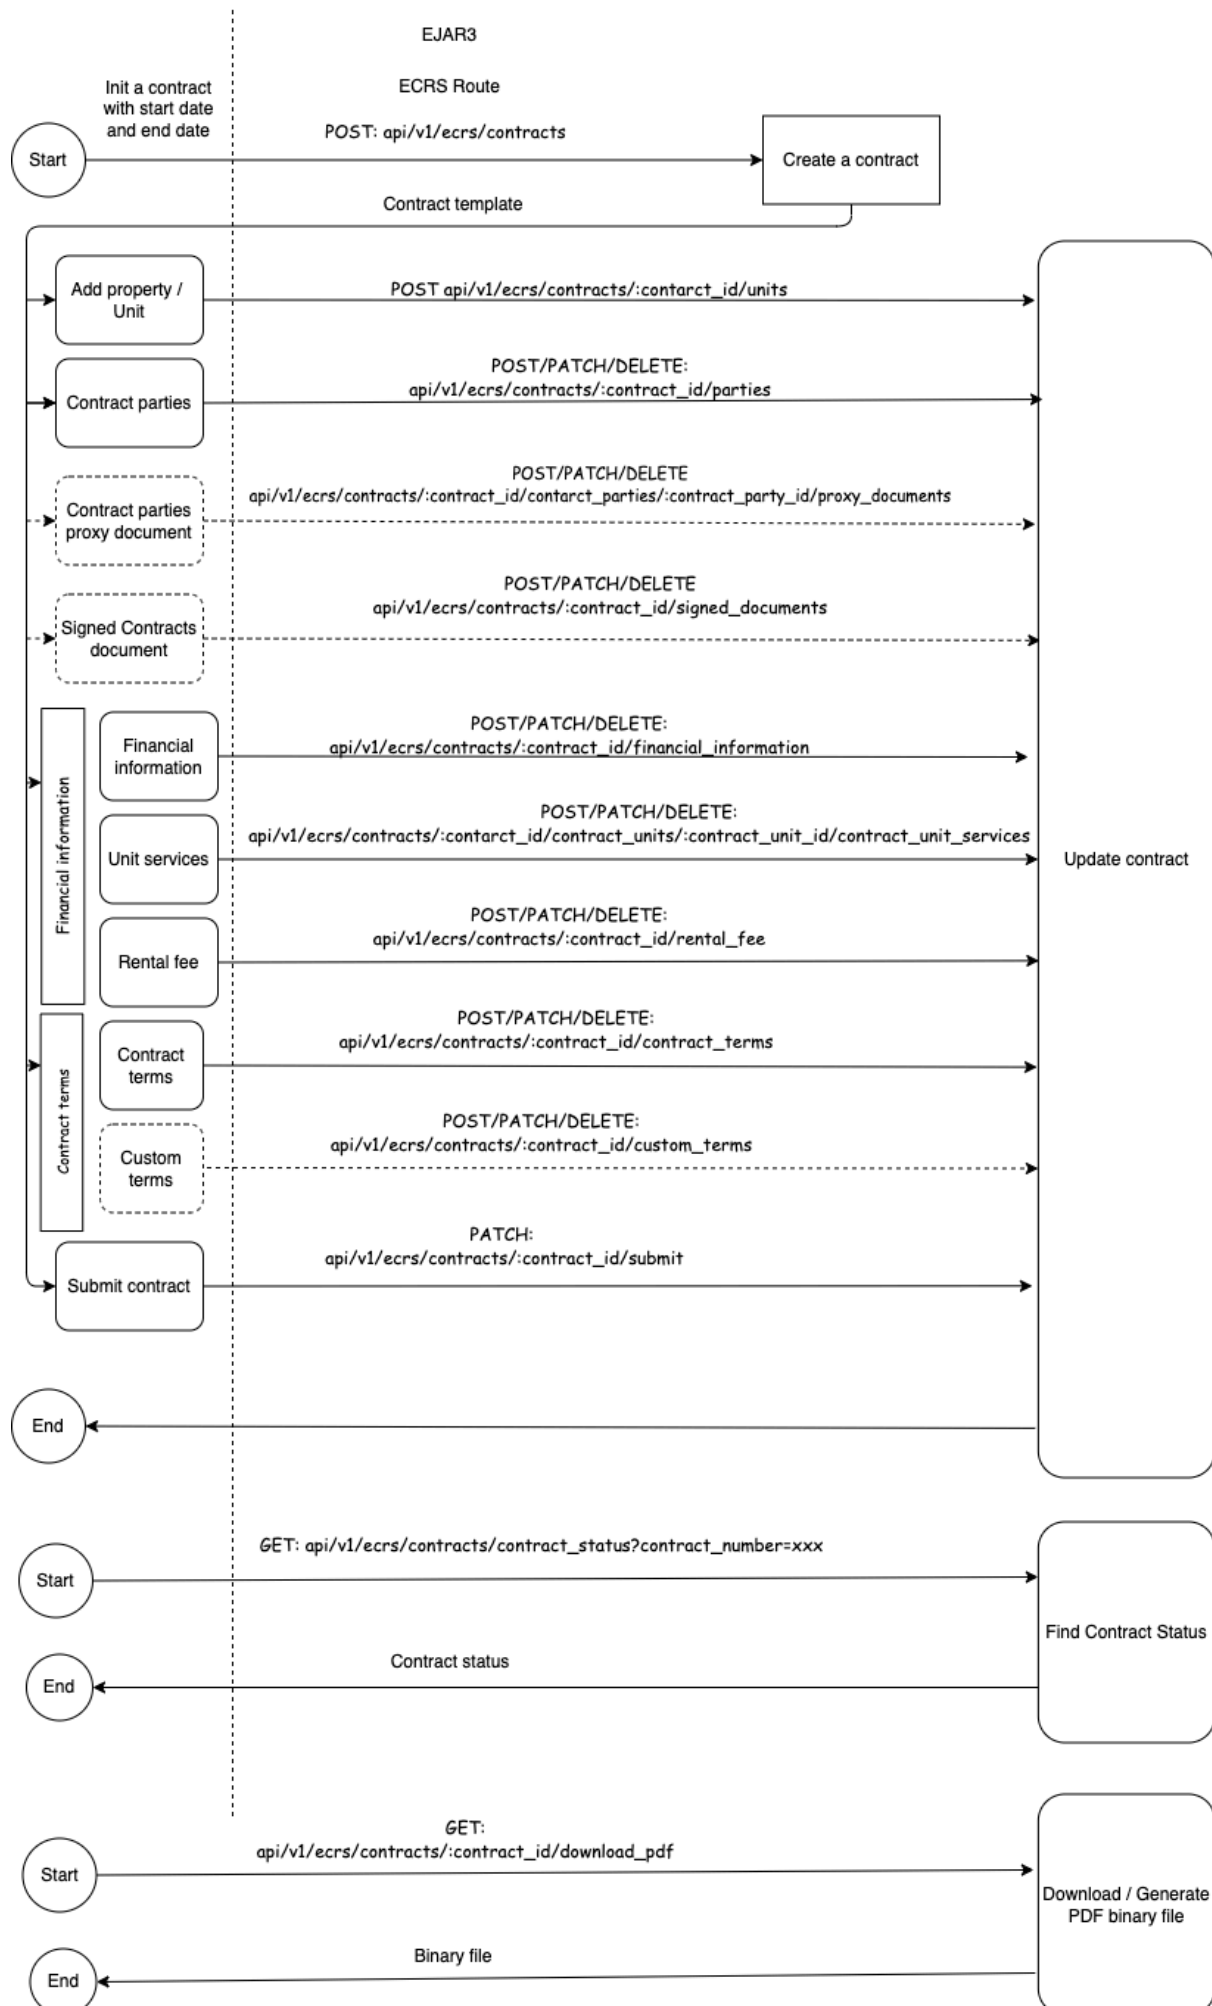

In this document, you will see curl example with `Authorization: Basic $API_CREDENTIAL`. You can use `API_CREDENTIAL` env variable to be able to copy and paste those example more easily:

```
export API_CREDENTIAL=RUNSUy1temlnMHYtMTRjZDpjcGwyZmcwcnU3ZzNncTU4M2o5NGxpY2Jh
```

External Contract Registration Service - Getting Started

External Contract Registration Service allows you to create and register new contract using API endpoints instead of the EJAR interface.

General architecture

Endpoint Format

All endpoints of ECRS follow [JSON API](#) format for both input and output.

Authentication

All endpoints require you to authenticate on the system. [More information is available here](#)

Domain URL

API Domain URL (For system to system integration)

<https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs>

Web Portal URL (only to access Ejar interface not for integration)

<https://uat-ejar3.housingapps.sa>

For more details please contact NHC integration support team via email: integration.support@nhc.sa by looping NHC Product Owner

Creating Properties and Units

Properties

- [Add new property](#)
- [List all properties](#)
- [Ownership documents](#)
- [Ownership documents owners](#)
- [Ownership proxy documents](#)

Units

- [Add new unit under a property](#)
- [List all units of a property](#)

Creating and submitting a new contract

- [Creat \(init\) your new contract](#)
- [Fill your contract:](#)
 - [Add a unit \(of a property\) to the contract](#)
 - [For commercial contract only: Add commercial extra info](#)
 - [Add advertisement number to the contract \(if needed\)](#)
 - [Add parties \(lessor/ tenant\) to the contract](#)
 - [Upload proxy documents \(if needed\)](#)
 - [Add financial information to the contract](#)
 - [Add unit services to the contract \(if needed\)](#)
 - [Add terms and conditions to the contract](#)
 - [Add custom terms to the contract \(if needed\)](#)
 - [Upload signed documents \(if needed\)](#)
- [Submit your contract](#)

Managing your contracts

Additional endpoints are available, letting you show, filter, and manage existing contracts:

- [List contracts managed by your office](#)
- [View a contract detail](#)
- [Get contract status](#)
- [Archive draft contracts](#)
- [List contract invoices](#)

Brokerage Agreements

- [List brokerage agreements](#)

Manage My Office

- [Recharge office wallet](#)

Other points

- All ECRS requests will be logged in Ejar.

Contract

List contracts

To list existing contracts:

- Ejar:
`https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts`
- Moho:
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContracts`
- Method: `GET`

Input

```
{}
```

Field description

Filter	Description	Possible value
<code>ids_in</code>	Filter by specific contract ids	String[] (uuid)
<code>property_id__in</code>	Filter by property ids	String[] (uuid)
<code>state</code>	Filter by contract states (separated by commas)	String
<code>brokerage_office_name__prefix</code>	Filter by brokerage office name prefix	String
<code>brokerage_office_cr_number</code>	Filter by brokerage office CR number	String

<code>contract_number</code>	Filter by specific contract number	String
<code>contract_type</code>	Filter by contract type	<code>residential / commercial</code>
<code>contract_portfolio_ownerships.document_number</code>	Filter by ownership document number	String
<code>lessor.id_number</code>	Matching a specific lessor id	String. Must match NIC ID number.
<code>lessor.full_name</code>	Matching a specific lessor name	String
<code>tenant.id_number</code>	Matching a specific tenant id	String. Must match NIC ID number.

`tenant.full_name`

Matching a
specific tenant
name

String

Pagination

The API endpoint will return a maximum of 50 contracts per page. To go to the next page, you must use the optional `page` argument

Output

Output follows [JSON API](#) syntax. As there is multiple relationship included to a contract, it is recommended to use a library to decode and relink the objects

      "rertd_response_owners": []
    },
    "relationships": {
      "contract": {
        "meta": {
          "included": false
        }
      }
    }
  }
]
}

```

Additional information

- The system will response the latest version if the request does not provide specific contract version.

Creating a new contract

- Ejar: <https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts>
- Moho: <https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContract>
- Method: POST

Specification

Input

```
{
  "data": {
    "attributes": {
      "contract_start_date": "YYYY-MM-DD",
      "contract_end_date": "YYYY-MM-DD",
      "contract_type": "residential",
      "custom_terms_accepted": true
    }
  }
}
```

Field description

Field	Description	Possible value
<code>contract_start_date</code>	Day when the contract starts.	YYYY-MM-DD format; Gregorian; must be in the future
<code>contract_end_date</code>	Day of expiration of the contract.	YYYY-MM-DD format; Gregorian; must be in future from <code>contract_start_date</code>
<code>contract_type</code>	Type of contract to create	<code>residential</code> or <code>commercial</code>
<code>custom_terms_accepted</code>	Accept custom terms. It must be true if the contract include the custom terms - additional terms	Boolean. <code>true</code> / <code>false</code>

Output

```
{
  "status": 200,
  "result": "success",
  "data": {
    "attributes": {
```

```
{
  "id": "<contract id>",
  "contract_number": "10406241732",
  "version": 1,
  "contract_start_date": "2022-09-09",
  "contract_end_date": "2023-09-09",
  "contract_type": "residential",
  "contract_sub_type": "main",
  "previous_version_contract_id": null,
  "main_contract_id": null,
  "custom_terms_accepted": true,
  "platform": "ECRS"
}
```

Additional information

- Any newly created draft contract which would not have been updated for a week are automatically archived and cannot be processed further anymore.
- `Backdate` is not supported.

[Material for MkDocs](#)

Select unit(s) and property related to the contract

Introduction

Once your contract is created, you need to attach a property and unit(s) as object of the contract:

1. [Attach existing property](#) or [create a new one](#)
2. [Select one of units under selected property](#) or [create new unit under selected property](#)
3. [Attach the unit to the contract](#)
4. [Remove an unit](#)
5. [Remove property and its units](#)

Attach selected unit and selected property to contract

Once your unit is created or found, you need to attach it to the contract:

- **Ejar:** `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/units`
- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContractUnit?ContractId=<contract_id>`
- **Method:** POST

Input

```
{
  "data": {
    "contract_property": {
      "id": "<property_id>",
      "contract_units": [
        {
          "id": "<unit_id>"
        }
      ]
    }
  }
}
```

Output

In case property acknowledgement is deactivated

```
{
  "data": [
    {
      "id": "<id>",
      "type": "contract_units",
      "attributes": {
        "contract_id": "<contract_id>",
        "unit_id": "<id>",
        "unit_rent": {
          "amount": 0,

    }
  },
  "meta": {
    "is_acknowledgement_response": true
  }
}
```

Remove an unit

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/units/<unit_id>`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/DeleteContractUnit?ContractId=<contract_id>&UnitId=<unit_id>`
- Method: `DELETE`

Input

```
{}
```

Output

```
{}
```

Remove property and its units

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/properties`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/DeleteContractProperties?ContractId=<contract_id>`
- Method: `DELETE`

Input

```
{}
```

Output

```
{}
```

Material for MkDocs

Select Parties

Once the contract is created and one or multiple units are selected, two parties - the lessor and tenants - needs to be added.

Get contract Parties

Retrieve parties associated with a contract, either individual or organization entities

- **Ejar:** `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/parties`
- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContractParties?ContractId=<contract_id>`
- **Method:** `GET`

Input

```
{}
```

Output

- **Individual party**

```
{
  "status": 200,
  "result": "success",
  "data": [
    {
      "id": "<contract_party_id>",
      "type": "contract_parties",
      "attributes": {
        "party_type": "individual",
        "protect_lessor_identity": false,
        "role": "lessor",
        "created_at": "2022-03-31T07:09:23.412Z",
        "approved": false
      },
      "relationships": {
        "entity": {
```

```

      "data": {
        "type": "individual_entities",
        "id": "<id>"
      },
    ],
    "proxy_documents": {
      "data": []
    },
    "tenant_organization_activity": {
      "data": null
    }
  }
}
]
}

```

- Organization party

```

{
  "status": 200,
  "result": "success",
  "data": [
    {
      "id": "<contract_party_id>",
      "type": "contract_parties",
      "attributes": {
        "party_type": "organization",
        "protect_lessor_identity": null,
        "role": "lessor",
        "created_at": "2022-04-05T11:25:30.684Z",
        "approved": false
      },
      "relationships": {
        "entity": {
          "data": {
            "type": "organization_entities",

      },
      "tenant_organization_activity": {
        "data": null
      }
    }
  ]
}

```

Get a contract Party

Retrieve a contract party associated with a contract by id, either individual or organization entities

- Ejar:
https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/parties/<contract_party_id>

- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContractParty?ContractId=<contract_id>&PartyId=<contract_party_id>`
- **Method:** GET

Input

```
{}
```

Field description

Field	Description	Possible value
<code>contract_id</code>	Contract ID	String (UUID)
<code>contract_party_id</code>	Party ID	Integer

Output

- Individual party

```
{
  "status": 200,
  "result": "success",
  "data": {
    "id": "<id>",
    "type": "contract_parties",
    "attributes": {
      "party_type": "individual",
      "protect_lessor_identity": false,
      "role": "lessor",
      "created_at": "2022-03-31T07:09:23.412Z",
      "approved": false
    },
    "relationships": {
      "entity": {
        "data": {
          "type": "individual_entities",
          "id": "<id>"
        }
      },
      "proxy_documents": {
        "data": []
      },
      "tenant_organization_activity": {
        "data": null
      }
    }
  }
}
```

```

    }
  }
}

```

- Organization party

```

{
  "status": 200,
  "result": "success",
  "data": {
    "id": "<contract_party_id>",
    "type": "contract_parties",
    "attributes": {
      "party_type": "organization",
      "protect_lessor_identity": null,
      "role": "lessor",
      "created_at": "2022-04-05T11:25:30.684Z",
      "approved": false
    },
    "relationships": {
      "entity": {
        "data": {
          "type": "organization_entities",
          "id": "<id>"
        }
      }
    },
    "proxy_documents": {
      "data": []
    },
    "tenant_organization_activity": {
      "data": null
    }
  }
}

```

Add contract Parties

Adding contract parties such as lessor, tenant, lessor representative and tenant representative into the contract

- Ejar: https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/parties
- Moho: https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContractParty?ContractId=<contract_id>
- Method: POST

Input

```

{
  "data": {
    "type": "contract_parties",
    "attributes": {
      "role": "<role>",
      "protect_identity": false,
      "is_representative": false
    }
  },

```

```

    "relationships": {
      "entity": {
        "data": {
          "id": "<id>",
          "type": "organization_entities"
        }
      }
    }
  }
}

```

Field description

Field	Description	Possible value
<code>data.attributes.role</code>	Party role	String: <code>lessor</code> , <code>tenant</code> , <code>lessor_representative</code> , <code>tenant_representative</code>
<code>data.attributes.protect_identity</code>	Protect Identity	Boolean
<code>data.attributes.is_representative</code>	Is representative	Boolean
<code>data.relationships.entity.data.id</code>	Entity ID, which getting from entities endpoints	String, UUID
<code>data.relationships.entity.data.type</code>	Entity Type	string, <code>organization_entities</code> , <code>individual_entities</code>

Note:

- The property owner will be the lessor on the contract, and the property representative will be the lessor representative on the contract. Those data apply automatically when user select a property.
- The Brokerage Office manager/user can add/update the lessor/lessor representative manually. There is not any validations to check the lessor is a property owner.
- The proxy document(s) is/are required in case of any representatives on the contract parties. And the proxy documents have to be valid, it must not a expired document.

Output

- Individual party

```
{
  "status": 200,
  "result": "success",

Update contract Party

Using this endpoint to update the `party role` and `protect_lessor_identity`. If you want to change contract party information, example from `Party A` to `Party B`, you need to delete the `Contract party A` and then add the `Contract party B` to the contract

- **Ejar:**
`https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/parties/<contract_party_id>`
- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PatchContractParty?ContractId=<contract_id>&PartyId=<contract_party_id>`
- **Method:** `PATCH`

Input

```
{
  "data": {
    "attributes": {
      "role": "<role>",
      "protect_identity": false
    },
    "relationships": {
      "entity": {
        "data": {
          "id": "<entity_uuid>",
          "type": "organization_entities"
        }
      }
    }
  }
}
```

Field description

Field	Description	Possible value
<code>data.attributes.role</code>	Party role	String: <code>lessor</code> , <code>tenant</code> , <code>lessor_representative</code> , <code>tenant_representative</code>
<code>data.attributes.protect_identity</code>	Protect Identity	Boolean

<code>data.relationships.entity.data.id</code>	Entity ID, which getting from entities endpoints	String, UUID
<code>data.relationships.entity.data.type</code>	Entity Type	<code>string</code> , <code>organization_entities</code> , <code>individual_entities</code>

Output

- Individual party

```
{
  "status": 200,
  "result": "success",
  "data": [
    {

Add Contract Unit Service

- Ejar:
https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/contract_units/<contract_unit_id>/contract_unit_services
- Moho:
https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContractUnitService?ContractId=<contract_id>&UnitId=<contract_unit_id>
- Method: POST

Input for metered_fee

```
{
  "data": {
    "type": "contract_unit_services",
    "attributes": {
      "utility_service_type": "electricity",
      "to_be_paid_by": "metered_fee",
      "meter_type": "shared_meter",
      "electricity_premise_id": "1234567890",
      "number_of_services": 1,
      "selected": true,
      "service_provider": "marafiq",
      "account_no": "12345678"
    }
  }
}
```

Input for fixed_fee

```
{
  "data": {
    "type": "contract_unit_services",
    "attributes": {
      "utility_service_type": "electricity",
      "to_be_paid_by": "fixed_fee",
      "meter_type": "shared_meter",
      "electricity_premise_id": "1234567890",
      "number_of_services": 1,
      "to_be_paid_at": { "amount": "50", "currency": "SAR" },
      "selected": true,
      "service_provider": "marafiq",
      "account_no": "12345678"
    }
  }
}
```

Field description

Field	Description	Possible value	Mandatory?
contract_id	Contract ID. It was provided after adding Contract	UUID	Yes

<code>contract_unit_id</code>	Contract Unit ID. It was provided after adding Unit to Contract	Integer	Yes
<code>type</code>	Submitted data type	String <code>contract_unit_services</code>	No
<code>utility_service_type</code>	The unit service name	String <code>water, gas, electricity, parking_space, internet, gym, swimming_pool</code>	Yes
<code>meter_type</code>	It should be filled if <code>utility_service_type = electricity / water</code>	String <code>shared_meter, separated_meter, other</code>	Yes (when met condition)
<code>to_be_paid_by</code>	The lessor can pay for the service by, if <code>meter_type = shared_meter / separated_meter</code>	String <code>metered_fee, fixed_fee</code>	Yes (when met condition)
<code>to_be_paid_per</code>		String <code>monthly, quarterly, half-annually, annually</code>	No
<code>meter_current_reading</code>	It should be filled if <code>meter_type = gas</code>	String	Yes (when met condition)
<code>invoice_paid_by</code>	It should be filled if <code>meter_type = separated_meter</code>	String <code>lessor, tenant</code>	Yes (when met condition)

<code>number_of_services</code>	The number of services which be provide to the lessee	Integer	No
<code>service_provider</code>	The utility service provider name	String <code>marafiq</code>	No
<code>account_no</code>	It should be filled if <code>utility_service_type = electricity</code> OR <code>service_provider = marafiq</code>	String	Yes (when met condition)
<code>to_be_paid_at.amount</code>	The amount which lessor need to pay. It should be filled if <code>to_be_paid_by = fixed_fee</code>	Integer	Yes (when met condition)
<code>to_be_paid_at.currency</code>	The currency which lessor need to pay. It should be filled if <code>to_be_paid_by = metered_fee</code>	String <code>SAR</code>	Yes (when met condition)
<code>electricity_other_meter_type</code>	It should be filled if <code>utility_service_type = electricity</code> & <code>meter_type = other</code>	String <code>government_site, inactive_site, final_pullout_site, disconnected_site, sec_facilities, multi_meter_site, compound_site, temporary_site, commercial_site, collective_accounts_site, other</code>	Yes (when met condition)
<code>electricity_premise_id</code>	It should be filled if <code>utility_service_type = electricity</code>	String	Yes (when met condition)

<code>water_meter_account</code>	It should be filled if <code>utility_service_type = water</code>	String	Yes (when meter condition)
<code>selected</code>	Enable the service	Boolean <code>true, false</code>	Yes

Note

- `selected = false` means the services will not include to the contract.
- Service fee will include to the rental fee. So, we need to add the unit services before adding rental fee information.
- For SEC provider, the `account_no` must be either 11 digits without prefix 0 or 12 digits with prefix 0.
- For MARAFIQ provider, the `account_no` must be 8 digits.

Output

```
{
  "data": {
    "id": "<contract_unit_service_id>",

  },
  "relationships": {}
}
```

Update Contract Unit Service

- Ejar:
https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/contract_units/<contract_unit_id>/contract_unit_services/<contract_unit_service_id>
- Moho:
https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PatchContractUnitService?ContractId=<contract_id>&UnitId=<contract_unit_id> (Not sure UnitId= or UnitId=)

- Method: `PATCH`

Input

```
{
  "data": {
    "type": "contract_unit_services",
    "attributes": {
      "utility_service_type": "water",
      "to_be_paid_by": "fixed_fee",
      "meter_type": "shared_meter",
      "number_of_services": 1,
      "to_be_paid_at": { "amount": "10", "currency": "SAR" },
      "selected": true,
      "service_provider": "marafiq",
      "account_no": "12345678"
    }
  }
}
```

Field description

Field	Description	Possible value	Mandatory?
<code>contract_id</code>	Contract ID. It was provided after adding Contract.	UUID	Yes
<code>contract_unit_id</code>	Contract Unit ID. It was provided after adding Unit to Contract.	Integer	Yes
<code>contract_unit_service_id</code>	Contract Unit Service ID. It was provided after adding Unit Service to Contract.	Integer	Yes

(please see other attributes above)

Note

- `selected = false` means the services will not include to the contract.
- In case of the rental fee is already exit, users have to update the rental fee after updating the Unit services

Output

```
{

Add Contract Rental fee type

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/rental_fee`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContractRentalFee?ContractId=<contract_id>`
- Method: `POST`

Input

```
{
  "data": {
    "type": "rental_fees",
    "attributes": {
      "rent_type": "for_each_unit",
      "billing_type": "monthly",
      "utilities_and_services_required": true
    }
  }
}
```

Field description

Field	Description	Possible value
<code>type</code>	<code>rental_fees</code> is a name of data. It's optional field	String. <code>rental_fees</code>
<code>attributes.rent_type</code>	Rental type	String: <code>for_all_units</code>
<code>attributes.billing_type</code>	Billing type	<code>monthly</code> , <code>quarterly</code> , <code>bi-annual</code> , <code>annual</code> , <code>one_time_pay</code>
<code>attributes.utilities_and_services_required</code>	Required for utilities and services	Boolean

Note

- In case of `utilities_and_services_required` turned ON, we we should add Contract Unit Services before adding rental fee.

- The `attributes.rent_type` value must be set to `for_each_unit` only, and the rental amount for each unit should be specified using the [Update Contract Unit Rent](#) section

Output

```
{
  "data": {
    "id": "1028632510",
    "type": "rental_fees",
    "attributes": {

        "ar": "<error details in arabic>"
      }
    }
  ]
}
```

[Material for MkDocs](#)

Submit the contract terms and custom term

Introduction

Once your contract is created, you need to attach term(s) or/and a custom term as object of the contract:

1. [Getting contract terms template](#)
2. [Attach contract terms](#)
3. [Attach contract custom terms](#)

Contract terms template

Getting the terms template base on contract type

You submit a GET request to the server to get all of the terms for a contract. This is the list of terms which you need to check before submitting the contracts

Endpoint

- Ejar:
`https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/contract_terms/term_templates`
- Moho:
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContractTermTemplates?ContractId=<contract_id>`
- Method: GET

Input

```
{}
```

Output

```
{
  "status": 200,
  "result": "success",
  "data": [{
    "type": "contract_term_templates",
    "attributes": {
      "id": "bigint_id",
      "term_code": "1",
      "term_slug": "subleasing_and_lease_transfer",
      "term_category": " ",
      "sort_order": "1",
      "title": { "ar": "التأجير من الباطن أو التنازل للغير", "en": "Subletting or lease transfer" },
      "description": {
        "ar": "يتم تحديد الإلتزمات بناء على اختيار أحد المواد التالية",
        "en": "The obligations are determined based on choosing one of the following materials"
      },
      "mandatory": [],
      "allow_user_to_add_options": "",
      "input_elements": ""
    }
  ]
}
```

Attach Contract terms

Endpoint

- **Ejar:** `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/contract_terms`
- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostContractTerms?ContractId=<contract_id>`
- **Method:** POST

Input

```
{
  "data": {
    "type": "contract_terms",
    "attributes": {
      "term_type": "residential",
      "ejar_fees_paid_by": "brokerage_office"
    },
    "relationships": {
      "contract_term_answers": {
        "data": [
          {
            "type": "contract_term_answers",
            "attributes": {
              "enabled": true,
              "term_template_id": 33,
              "term_template_key": "residential_auto_renewal",
              "answers": {
                "cancel_auto_renewal_notice_period_in_days": 60
              },
              "custom_options": {}
            }
          },
          {
            "type": "contract_term_answers",
            "attributes": {
              "enabled": true,
              "term_template_id": 36,
              "term_template_key": "tenant_can_sublease",
              "answers": {},
              "custom_options": {}
            }
          }
        ]
      }
    }
  }
}
```

Field description

Field	Description	Possible value
<code>contract_id</code>	Contract ID	String, UUID

<code>term_type</code>	Term type	<code>residential,</code> <code>unified_contract,</code> <code>open_contract</code>
<code>ejar_fees_paid_by</code>	Ejar fee Person in charge	<code>brokerage_office,</code> <code>lessor</code>
<code>contract_term_answer.enabled</code>	Enable/disable the term	boolean
<code>contract_term_answer.term_template_id</code>	Term answer template id, which getting from the template above	int
<code>contract_term_answer.term_template_key</code>	Term template key, which getting from the template above	String
<code>contract_term_answer.answers</code>	The answer. It should follow the <code>input_elements</code> from the template example <code>{"who_pays_authorities_fees": "lessor"}</code>	String, Jsonb type
<code>contract_term_answer.custom_options</code>	The custom answer	String, Jsonb type

Output

```
{

      },
      "relations": {
        "contract_term_answers": [
          {
            "id": "bigint_id",
```

content

custom term
content

String

Output

```
{
  "status": 200,
  "result": "success",
  "data": [
    {
      "type": "contract_terms",
      "attributes": {
        "id": "bigint_id",
        "contract_id": "b54f4844-fb1e-5e41-a33a-fc6aaedaf61b",
        "content": "<custom terms>",
        "created_at": "2022-04-20 06:27:33.442",
        "updated_at": "2022-04-20 06:27:33.442"
      }
    }
  ]
}
```

Note:

- To accept the custom terms (additional conditions), please enable `contract.custom_terms_accepted = true` on the contract information.
- In case of `contract.custom_terms_accepted = false`, there is not any custom terms display on the contract.

Show contract custom term

Endpoint

Invoices Endpoints

List all contract invoices

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/invoices`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContractInvoices?ContractId=<contract_id>`
- Method: `GET`

Get all brokerage agreements

Input

```
{
  "filter": {
    "types": "123",
    "status": "apvd",
    "major_version": "112",
    "minor_version": "33"
  },
  "page": {
    "number": 1,
    "size": 5
  },
  "sort": {
    "type": "desc"
  }
}
```

Parent path	Field	Description	Possible value	Required
-------------	-------	-------------	----------------	----------

<code>contract_id</code>		Contract ID	UUID	Yes
<code>page</code>	<code>number</code>	Page number. It use for pagination, default is page 1	Integer	No
<code>page</code>	<code>size</code>	Page size. It use for pagination, default is 5 records per page	Integer	No
<code>filter</code>	<code>types</code>	Invoice type	<code>recharge</code> <code>ejar_fee</code> <code>rental_fee</code> <code>sec_inv</code> <code>waiver</code> <code>incident</code>	No
<code>filter</code>	<code>status</code>	Invoice status	<code>apvd</code> <code>clos</code> <code>cncl</code> <code>del</code> <code>drft</code> <code>exp</code>	No
<code>filter</code>	<code>major_version</code>	Invoice major version ID	String	No
<code>filter</code>	<code>minor_version</code>	Invoice minor version	String	No
<code>sort</code>	<code><field_name></code>	Sort by field	<code>asc</code> <code>desc</code>	No

Archive a contract

Archived contracts are still accessible to show. They can't however be submitted nor edited anymore.

- Ejar:

```
https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>
```

- **Moho:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/DeleteContract?ContractId=<contract_id>`
- **Method:** `DELETE`

Input

```
{}
```

Output

```
{}
```

Contract's Advertisement Number

Add contract advertisement number

- **Ejar:** `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/<contract_id>/ad_number`
- **MoHo:**
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PatchContractADNumber?ContractId=<contract_id>`
- **Method:** `PATCH`

Input

```
{  
  "data": {  
    "attributes": {  
      "ad_number": "string"  
    }  
  }  
}
```

Output

```
{  
  "data": {
```

```

Getting contract status

Getting contract status

You have the possibility to query a contract's status with contract number and version, using `filter` argument:

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/contracts/contract_status`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetContractStatus?ContractNumber=<contract_number>`
- Method: `GET`

Input

```
{
  "contract_number": "123456789"
}
```

Field description

Filter	Description	Possible value
<code>contract_number</code>	Filter by specific contract number.	string

Output

```
{
  "status": 200,
  "data": {
    "contract": {
      "contract_status": "<contract state>",
      "status_date": "<contract status_date>"
    }
  }
}
```

Additional information

- The system will response the latest version if the request does not provide specific contract version.

IBAN Endpoints

Adding iBan to Individual Entity

- Ejar:
`https://uat-ejar3.housingapps.sa/api/v1/ecrs/individual_entities/<individual_entity_uuid>/ibans`
- Moho:
`https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/PostIndividualIBAN?IndividualUUID=<individual_entity_uuid>`
- Method: **POST**

Input

```
{
  "data": {
    "attributes": {
      "iban_number": "SA9656719372261235849279",
      "bank_name": "A Bank",
      "alias_name": "IBAN fromm rspec 1"
    }
  }
}
```

Filter	Description	Possible value
<code>bank_name</code>	Bank name	String
<code>alias_name</code>	Alias name	String
<code>swift_code</code>	Swift code	String
<code>bank_address</code>	Bank address	String
<code>mobile</code>	Mobile number	String

Output

```
{
  "data": {
    "id": "<iban_id>",
    "type": "ibans",
    "attributes": {
      "iban_number": "SA9656719372261235849279",

Title Deed Endpoints

List all title deeds

- Ejar: `https://uat-ejar3.housingapps.sa/api/v1/ecrs/ownership_documents`
- Moho: `https://integration-gw.housingapps.sa/nhc/uat/v1/ejar/ecrs/GetOwnershipDocuments?filter[ownership_document_type]=<ownership_document_type>`
- Method: `GET`

Get all title deeds under the brokerage office

Input

```
{
  "filter": {
    "ownership_document_type": "paper_title_deed",
    "document_number": "1010000001",
    "issued_date": "05-03-2023",
    "issued_by": "Tester",
    "issue_place": "Riyadh",
    "expiry_date": "2023-04-25"
  },
  "page": {
    "number": 1,
    "size": 5
  }
}
```

Parent path	Field	Description	Possible value	Required
page	number	Page number. It use for pagination, default is page 1	Integer	No
page	size	Page size. It use for pagination, default is 5 records per page	String	No
filter	ownership_document_type	Title deed's type	electronic_title_deed paper_title_deed other real_estate_registry_title_deed	No

filter	document_number	Title deed's number	String	No
filter	issued_date	Title deed's issued date	String	No
filter	issued_by	Title deed's issuer	String	No
filter	issue_place	Title deed's issued place	String	No
filter	expiry_date	Title deed's expiry date	String	No
filter	legal_document_type_name	Title deed's alternative type name (when ownership_document_type = other)	String	No

Output

```
